**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

a) those claims directed to making a cosmetic cover wherein the means to create a non-homogenous color effect are in the form of colored lengths of fibers.

b) those claims directed to making a cosmetic cover wherein the means to create a non-homogenous color effect comprise a variation in the thixotropy of the one or more curable materials.

c) those claims directed to making a cosmetic cover wherein the means to create a non-homogenous color effect comprise dye-containing capsules having a form which allows the passage of the dye material within them into the layer during or after the curing process.

d) those claims directed to making a cosmetic cover wherein the means to create a non-homogenous color effect comprise a dye introduced directly into the layer.

e) the claim directed to making a colored layer of material comprising introducing a dyestuff in a curable layer to provide a non-homogenous colored layer.

f) the claim directed to making a colored layer of material comprising introducing a dyestuff in a cured layer to provide a non-homogenous colored layer.

Art Unit: 1732

g) the claim directed to making a colored layer of material comprising varying the thixotropy of at least one curable material from which such a layer is made, thereby to produce a non-homogenous color effect in the layer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1732

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
